AMAZON TRANSCRIBE

VALT integrations offers a fast, affordable, and high accuracy audio transcription service. VALTs transcribe services uses a deep learning process called automatic speech recognition (ASR) to convert speech to text quickly and accurately. IVS Transcribe make any audio and video searchable, editable and shareable. Please visit <https://calculator.aws/#/createCalculator/Transcribe> for an estimated quote.

FEATURES & BENEFITS

- **Searchable Text** – Search and analyze your text. Generate metadata to create a fully searchable archive. Transcribe enables you to easily find specific words.
- **Export Transcript** – Download your transcript into text (MS Word, PDF) or closed caption files (SRT, VTT). This simple format lets you load the document into any third party programmers software for reporting or research purposes.
- **Automate Subtitling with the Closed Caption (CC) Button** –
 - Caption video to give people with hearing disabilities access to your content.
 - Captions improve the user experience, making videos viewable in different environments.
 - Easier comprehension for non-native English speakers. Allow viewers to read along with the spoken word, which can clarify hard-to-understand dialogue.
 - Closed caption improves average watch time. Reading triggers different parts of the brain than listening and can help viewers engage more deeply with the content.
